

What is *Gardening Landscape and Horticulture Collection*?

Gardening Landscape and Horticulture Collection is a collection of nearly 50 journals and numerous books focused specifically on gardening, landscaping, and other areas of horticulture. This collection includes content relating to both the practical aspects as well as the scientific theory of horticulture studies, farming, landscape architecture and biotechnology.

Accessing *Gardening Landscape and Horticulture Collection*

Visit the Library web site and select *Resources-Databases* from the navigation bar. For details on how to access it off campus, select the *Off Campus Access* link or contact Campus library staff.

Search Assistance

Select the **Help** option located on most search and result pages within the database. Campus library staff can also provide assistance in searching the *Gardening Landscape and Horticulture Collection* database.

Searching *Gardening Landscape and Horticulture Collection*

➤ **Basic Search**

- Use **AND** to find articles that contain all search terms (e.g. roses **AND** hybrid)
- Use **OR** to find articles that contain either search term (e.g. annuals **OR** biennials)
- Use **NOT** to eliminate search terms (e.g. insects **NOT** pests)
- Use “ ” to find phrases - words that have to be beside each other (e.g. “ornamental trees”)
- Use * to find different forms of a word (e.g. landscap* retrieves landscape, landscapes, landscaping)
- Use ? to replace a character at the end or in the middle of a word (e.g. colo?r retrieves color, colour)

➤ **Advanced Search**

- Enter search terms or phrases and use the fields in the drop-down menus to run a more focused search. Use the **AND, OR, NOT** operators available in the drop-down menus to combine search terms.

Subject Terms

The *Subject Guide Search* link is located along the blue navigation bar and allows a searcher to explore subject terms used in the database. This search option is very useful at the beginning of the research process.

Publications

The *Publication Search* link is located along the blue navigation bar and is useful for browsing specific issues of a journal or to see if the database indexes a particular periodical title. A *Journal Alert* can also be created to notify searchers by email or RSS when new issues of a journal have been added to the database.

Results

The *Results* screen displays the retrieved articles which can be sorted by date or relevance. The searcher has the option of printing, emailing or marking articles to review before exiting the search session.

Bookmarks

If a searcher locates an interesting article and would like to bookmark it for future reference or email a link to a fellow student, click the *Bookmark* link at the top left of the main menu, or *Bookmark this Document* in the document header area. A new window pops up, enabling the searcher to copy/paste the URL into a new document, add to Favorites/Bookmarks, or email the link.
